Join our team!

About Us

- The Commercial Drone Alliance advocates for policies that will restore American global leadership in commercial drones and drone security by matching the pace of technological innovation in America.

- We provide our members with a platform through which their voices and opinions can be heard. We regularly meet with stakeholders in various federal government agencies such as the White House NSC and OSTP, FAA, DOT, DHS, DOD, NASA and more.

- Our main priorities:
  - Champion U.S. leadership in the global commercial drone and drone security ecosystem
  - Strengthen the broader commercial drone and drone security ecosystem
  - Enhance end user value, and foster a collaborative and connected commercial drone community to accelerate innovation

COMMERCIAL DRONE ALLIANCE

What some of our members had to say...

"What I love about CDA is that we're actually making a difference in policy. We're directly engaged and not afraid of the hard conversations."
James Grimsley, Choctaw Nation of Oklahoma, CDA Board Member

"The membership fee is nominal when you consider the amount of knowledge and access you receive."
Lukas Koch, Kelly Hills Unmanned Systems, CDA General Member

"Being a member is about education, participation, and a shared responsibility to help advance and raise the tide for the industry. We all benefit, so the more we work together and collaborate, the greater success we can achieve collectively and individually."
Eric Brock, Ondas, CDA Board Co-Chair

"Being a member of CDA gives you exposure to real-time policy and regulatory frameworks, allowing you to really participate. We have a much greater impact and ability to shape regulatory aspects. Being part of the CDA...helps you actually impact change."
Jeff Cole, Hidden Level, CDA Board Member
